Why 3%?
Our name "Toptal" comes from Top Talent — meaning we constantly strive to find and work with the best from around the world. Our rigorous screening process identifies experts in their domains who have passion and drive.
Of the thousands of applications Toptal sees each month, typically fewer than 3% are accepted.

Hi Obodugo,

On behalf of all of us here, congratulations on successfully passing the screening process and becoming a part of Toptal!

There are a few important steps to complete your onboarding before you can start working with Toptal clients.

First, please read through and confirm the Toptal platform agreement and training. If you have any questions or concerns about either of these materials, please let me know.

After that, you can start creating your Toptal profile, which is what we use to effectively market you to potential clients.

After your profile has been approved and finalized, you will complete a few legal items and set up your preferred method of payment. After that, you will be sent instructions to activate your Toptal email address. This is what you will use to log into the platform going forward, as well as sign up for an account on our active Slack community. We encourage you to participate actively in Slack where you can meet other Toptalers, ask for input from experts and stay in touch with recruiters for up-to-the-minute updates about cool, new opportunities.

Here are some other resources we wanted to pass along:
- How to create your Toptal profile video
- Toptal Headshot Guide
- Profile Creation Document
- Welcome / Pitching, Interviewing, Blog, Community

If you have any questions, don't hesitate to reach out!

Best,
Ivan
