Hi Team, congratulations!

Thank you for your patience. After gathering all feedback and a deep dive with our internal team, we are delighted to offer you a spot in our **Spring 2026 cohort #13 in our Studio Program.**

Here are the next steps to get things moving:

1. Sign the participation agreement
Based on our new investment terms, we are updating the **Participation Agreement**, so you should receive the emails for e-signatures from the *BoldSign* system within the next few days. Please review and sign by the end of next week.

2. Submit required documents
Once signed, you will see the required documents outlined. Please upload the **Exhibit B Documents** into this Google Drive folder we created for you. Also, here is a spreadsheet outlining the Exhibit B documents we'll need to review before the cohort begins. Please start uploading the documents as you gather them. There's no need to wait until you have everything; add the files as they become available.

3. Funding timeline
Funding will be processed once the Exhibit B requirements are met.

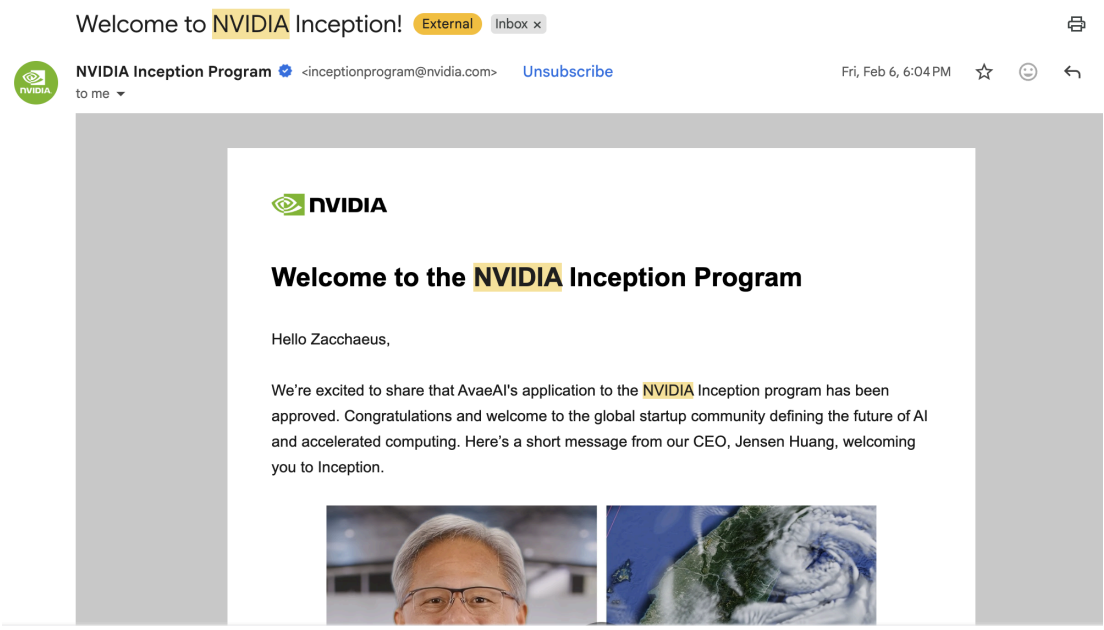

4. Program logistics
The Spring 2026 program will be fully **virtual.** We aim to start in late March/early April. We will announce the date once we have it confirmed.

Please don't hesitate to reach out if you have any questions. We are here to help. We're excited to work with you and support you throughout the program.

Best,

Google for Startups

Welcome to the Google for Startups Cloud Program!

We're pleased to offer your company $2,000 USD* in Google Cloud credits to use over the next two years to help build and grow your self-funded startup.

Here are few resources to help you make the most of your Google Cloud credits:

- Credits can be used for Firebase and Google Cloud Platform Services such as BigQuery and Cloud Run, as well as Select Google Cloud Offerings like Looker
- View your credits and track usage in your Google Cloud console
- Get started with the Cloud Setup Checklist, Documentation, and Technical Guides for Startups
- Redeem $200 credits on Google Cloud Skills Boost to learn how to build on Google Cloud through online courses and hands-on labs. Apply here.
- We've partnered with MongoDB to expand support for startups in our program. Unify operational, analytical, and AI services for intelligent apps, ensuring accuracy, scale, and security in your development journey with
