Application: 6564301863

Zacchaeus Bolaji - bolajizacchaeusa@gmail.com
Tech Nation Visa Application

Application Form

Completed - 15 May 2025

For instructions regarding application requirements, please see the Tech Nation's Guidance.

Application Form

OFFICIAL DETAILS

Are you applying for yourself or acting on behalf of an applicant?

Applying for myself

Are you applying directly for Global Talent or Switching from another visa category?

Applying directly for Global Talent

Please provide your Unique Application Number (UAN) from your completed Stage 1 endorsement application on the Gov.uk website:

This is required so that Tech Nation can match your application to your Home Office application. The UAN is usually available in the email sent to you by the Home Office or within the 'Document Checklist' attachment. This number must begin with 1212 and have 16 numbers and 3 dashes, for example: 1212-0001-0001-0001

Important: failure to provide this number correctly may lead to delays in processing your application!

1212-0001-5204-1918

What was the confirmed submission date of your Stage 1 endorsement application on the Gov.uk website:

This must be the official date of submission confirmed by the Home Office. It is important to enter the correct date, as this information may be used by the system to determine various settings, such as application questions or criteria.

1 May 2025

PERSONAL DETAILS

Full Name

Zacchaeus Adebayo Bolaji

Date of Birth

20 Nov 1994

Passport Number

B51396894

Gender

Male

Nationality

Nigeria

Country of residence

Germany

City of residence (or nearest)

Berlin

Intended UK country of residence

England

Intended region of residence in England

North West

Intended UK city of residence (or nearest)

Manchester

Current Residence address

Lotzestrasse 14

Current Residence postcode

37083

Is your Correspondence address the same as your Current Residence address?

Yes

Is your Intended Residence Address in the UK the same as your Current Residence address above?

No

Intended residence address in UK

(No response)

Intended UK residence postcode

(No response)

USEFUL INFORMATION

How did you hear about the Global Talent Visa?

Tech Nation Visa Alumni

How long ago did you first hear about the Global Talent Visa?

3 - 6 months

How long ago did you decide to apply for the Global Talent Visa?

1 - 3 months

Please tell us if you would like to receive emails from Tech Nation regarding visa related marketing and/or events (including partner events)?

Note: This confirmation is effective immediately and applies to both open and submitted applications.

Responses Selected:

I do not want to receive any marketing.

Tech Nation operates an Alumni Network for those who are successfully awarded the Global Talent visa. Would you like to receive emails from Tech Nation regarding the Alumni Network, including how to join and related events?

Responses Selected:

I agree to receive emails regarding the Alumni Network

FAST TRACK OPTIONS

Do you wish your application to be considered for the Fast Track option?

Please note that Fast track only impacts Tech Nation's processing times, it does not impact eligibilty. Tech Nation is unable to inform you whether your application is being processed under Fast Track. Please see the Fast Track section on the official Global Talent website for more information.

No

CAREER SUMMARY

How long has your career been in the digital technology sector?

Less than 5 years in digital technology

SECTOR / SKILLS

Please indicate your sector

Data & Analytics

Please indicate your specialist skill

Software engineer

EDUCATION

Highest formal education level completed

Bachelors degree

Name of university or institution

Please write the name of the institution as it appears on your certificate / official documents.

Federal University of Agriculture, Abeokuta

Location of university or institution

Nigeria

Highest professional qualification (if any)

Google Analytics Academy - Advanced Google Analytics

CURRENT EMPLOYMENT

Are you currently employed? (either as an employee or as a founder/director)

Yes

Present workplace/employer

Please only write the name of organisation.

44moles GmbH

Present position/role

Fullstack Engineer

Type of present position/role

Employee

Annual Salary and/or other compensation

€63500

Start date of present employment

1 Nov 2024

Address of present employer

Reinhard-Rube-Straße 4, 37077 Göttingen, Germany

Company registration number of present employer

HRB 206845

Website of present employer

NEW OR PENDING OFFER OF EMPLOYMENT IN UK

Please only select 'Yes' if you have been offered a new role that is different to the current role you have provided above. Do not provide the same details as given above.

Have you been offered a job in the UK?

No

Are you actively looking for a job in the UK?

No

BUSINESS DETAILS

Do you have any active digital technology business(es) that you have established?

Yes

Are the business(es) registered in the UK?

No

Where are the business(es) registered?

United States

Company registration number

30-1397922

Website of active business(es)

https://mysub.io

Please provide details of the active digital technology business(es) you have established:

At MySub, our mission is to make digital subscriptions more affordable and accessible through seamless expense sharing. By allowing users worldwide to pool resources and enjoy content subscriptions collectively, we aim to reduce inequality in access to digital information, knowledge, and entertainment.

Do you have any dissolved digital technology business(es) that you have established?

Yes

Please provide details of the dissolved digital technology business(es) you have established:

RentieNG aimed to provide a marketplace for rental of everyday items. Users save a ton of money on purchases by renting tools and equiement instead of purchasing. And for listers, it serves as an additional source of income for tools & equipment mostly lying around idle and occupying space. RentieNG was selected For Tony Elumelu Foundation (TEF) grant for solving multiple Sustainable Development Goals (SDG)

ELIGIBILITY CRITERIA

Are you applying under the eligibility criteria for Exceptional Talent or Exceptional Promise?

Please select carefully because you will be presented with the relevant eligibility criteria for Exceptional Talent or Exceptional Promise and your application will be assessed accordingly.

Exceptional Promise

What is the main reason you have chosen to apply for the route of 'Exceptional Promise' (rather than Exceptional Talent)?

I've built scalable platforms across continents, launched award-winning startups, and created open-source tools used by millions. My work blends innovation with real-world impact, and I'm eager to bring this global, community-driven mindset to Manchester's vibrant tech scene and contribute meaningfully to the UK's digital future.

An applicant evidencing EXCEPTIONAL PROMISE must:

You must provide at least two unique pieces of evidence.

Responses Selected:

Show they have been recognised as having potential to be a leading talent in the digital technology sector in the last 5 years

Which criteria are you applying for? Please choose two of the following:

You must provide at least two unique pieces of evidence for each of the two chosen criteria

Responses Selected:

2 - A proof of recognition for work beyond the applicant's occupation that contributes to the advancement of the field

3 - Have made significant technical, commercial or entrepreneurial contributions to the field as a founder or employee of a product-led digital technology company

EVIDENCE FILES

The information requested below relates to the ten evidence files that you will upload as part of your application.

Note: Whilst you can use multiple documents to support each criteria, each document must only contain a single piece of related evidence.

Please provide the names of documents submitted in support of your mandatory 'leading talent' criteria for Exceptional Promise:

You must provide at least 2 unique pieces of evidence.

Zacchaeus: Evidence of Contributions to Tech-led Industry Initiative

Zacchaeus: Evidence of High Remuneration

Zacchaeus: Evidence of Recognition and Awards

Please provide the names of documents submitted in support of your first optional criteria for Exceptional Promise:

You must provide at least 2 unique pieces of evidence.

Zacchaeus: Contribution to Open Source and the Tech Community

Zacchaeus: Evidence of Earned Media Recognition

Zacchaeus: Evidence of Stack Overflow Account

Please provide the names of documents submitted in support of your second optional criteria for Exceptional Promise:

You must provide at least 2 unique pieces of evidence.

Final Version LoR Dima Every Health GmbH_signed

Zacchaeus: Evidence of Founding a Successful Digital Technology Company

Zacchaeus: Evidence of Leading Development of High Impact Digital Service

PERSONAL STATEMENT

Please explain why you believe you qualify for the Global Talent Visa and how you satisfy the criteria for Exceptional Promise

Personal Statements must be submitted using this form, separate uploads are not acceptable.

My name is Zacchaeus Bolaji, fondly called Zack by my friends, I am an innovator, an exceptional Software developer, I solve real world problems with my talent and I am writing to express my sincere interest in the UK Tech Nation Visa as an exceptional (promise) talent in the digital technology field, with a proven track record of building scalable platforms, I am eager to contribute my technical expertise and entrepreneurial vision to the UK's thriving tech ecosystem.

I have always had a knack for developing tools, even as an undergrad, such that upon graduation, fresh off the rack, I was building project management tools that streamlined customer support system for top companies like Baobab Partners LLC (USA), RelianceHMO (Nigeria), PrepclassNG, to name a few. I did this whilst building RentieNG, a property rental company designed to solve one of the major problems that affected small business owners who could not afford to buy work tools. As Co-Founder/CTO of RentieNG, I oversaw product development from concept to scale, growing the user base to 5,000+ active clients. Our innovative approach earned a $5,000 grant from the Tony Elumelu Foundation, a prestigious award for African entrepreneurs.

I founded MySub.io in the same period, a subscription-sharing platform. Since inception, we've onboarded 100,000+ users across 10 countries, addressing accessibility barriers in digital services. Featured in TechCabal for our disruptive model, MySub.io exemplifies my knack for identifying market gaps and executing scalable solutions.

In the same year, eager to contribute my talent to problem solving ideas, I contributed to and co-launched Made-in-Nigeria, an open-source repository showcasing Nigerian tech talent for global recruitment. With 1,000 stars on GitHub, it has become a vital resource for connecting African developers with global opportunities. This initiative earned recognition from TechCabal and ApNews, further solidifying my reputation as an advocate for inclusive tech growth.
My GitHub profile features over 20 published packages, and I rank in the top 1% of developers worldwide on CodersRank, a platform that evaluates coding prowess across 150+ countries. These achievements and recognition validate my technical caliber and align with Tech Nation's emphasis on exceptional talent.

Since then, my career and work experience has grown in leaps and bounds, highly sought after, I have led high-impact projects across Europe and Africa, specializing in SaaS platforms, cloud infrastructure, and data-driven solutions. At 44moles in Göttingen, I spearheaded the development of a Data-as-a-Service (DaaS) platform tailored for the climate tech sector. Collaborating with data scientists, I engineered tools that analyze forest data to identify

sustainability trends and investment opportunities, directly supporting global climate action. By optimizing backend processes and implementing real-time analytics, the platform improved operational efficiency by 25%, enabling clients to make data-driven decisions faster. This work required mastery of Python, AWS, and React.

Also, as Lead Engineer at EveryHealth GmbH in Berlin, I innovated a healthcare SaaS platform used by doctors, pharmacies, and administrators to streamline patient care. I also redesigned the existing infrastructure using Laravel and Vue.js, enhancing scalability and reducing latency by 40%. The platform's integration with third-party APIs automated manual workflows for pharmacies, cutting processing time by half.

My tenure as Senior Software Engineer at Hello Pine UG in Hamburg further highlights my DevOps proficiency. I led the transition to a new cloud provider, implementing Terraform for infrastructure-as-code and Kubernetes for container orchestration. This overhaul boosted application monitoring efficiency by 30% and reduced deployment times by 50% through automated CI/CD pipelines. Additionally, integrating Amazon Marketplace and WooCommerce APIs increased sales by 20%, demonstrating my capacity to align technical optimizations with business outcomes.

Beyond commercial projects, I have dedicated significant effort to open-source development, creating tools used by millions of developers worldwide. I contributed to LaravelBatch, a package which simplifies database batch operations, has been installed over 2.24 million times and is widely adopted in the Laravel community. Similarly, Laravel Log Viewer, a tool for streamlined log management, serves 198,000 developers globally. These contributions reflect my belief in collaborative innovation,a principle I plan to amplify in the UK by partnering with local tech communities.

Leading teams has been central to my success. By fostering mentorship and agile workflows, I cultivated a culture of accountability and creativity, principles I intend to share with UK tech teams. My leadership extends beyond management; I prioritize knowledge-sharing, having mentored junior developers in Nigeria and Germany, and I plan to continue this in the UK..

The UK's position as a global tech leader, home to 144 unicorns and a £1 trillion digital economy, makes it an ideal environment for my ambitions. Manchester, in particular, stands out for its vibrant mix of startups, scale-ups, and established firms like AO.com and The Hut Group. The city's affordability creates fertile ground for innovation. Culturally, the city's diversity resonates with my background as a Nigerian who has worked across three continents, and I am eager to contribute to its inclusive tech community.

I may explore launching a startup focused on subscription economies or open-source tools, leveraging Manchester's lower operational costs compared to London. I plan to expand my open-source projects by

collaborating with British universities and organizations, creating tools that address local challenges such as healthcare digitization or sustainable energy. Additionally, I will advocate for diversity in tech by mentoring underrepresented groups, drawing from my experience with ‘Made-in-Nigeria’.

Having already impacted industries in Germany, Nigeria, and the U.S., I am confident my technical acumen, entrepreneurial drive, and global perspective will enrich the UK’s digital landscape. I am committed to upholding the standards of excellence that the Tech Nation Visa represents.

My career embodies the qualities TechNation seeks: technical excellence, innovative problem-solving, and a passion for collaborative growth. My relocation to Manchester represents not just a personal milestone but a strategic step toward amplifying my impact in a globally connected tech hub. I am ready to contribute to the UK’s reputation as a leader in digital technology, and I humbly ask for the opportunity to do so.

Your Feedback

In Progress - Last edited: 15 May 2025

Form for "Your Feedback"

This is your opportunity to provide feedback regarding Tech Nation Visa so that we may improve the experience for future applicants. **It is entirely optional.**

This feedback will not be shared with our assessment panel and will not impact your assessment.

Thank you!

On a scale of zero to ten, how likely are you to recommend the Tech Nation Visa to a friend or colleague?

Zero is low and ten is high.

Rating	10

How would you rate the Home Office (Gov.uk) part of the process?

Zero is low and ten is high.

Rating	10

How would you rate the Tech Nation part of the process?

Zero is low and ten is high.

Rating	10

Please tell us about your experience and what you thought were the best and worst parts of the whole process?

PROFESSIONAL PROFILE

Fullstack Engineer with 4+ years of experience building scalable SaaS platforms, leading technical teams, and delivering measurable business impact across climate tech, healthcare, e-commerce, and fintech sectors. Proven expertise in JavaScript (TypeScript/Node.js), PHP (Laravel), Python, and cloud infrastructure (AWS, Docker). Recognised as a top 1% global developer (CodersRank) with 2.24M+ open-source package installs. Entrepreneurial leader with a track record of co-founding ventures like MySub.io (100k+ users) and securing grants from the Tony Elumelu Foundation.

PROFESSIONAL EXPERIENCE

Fullstack Engineer
44moles | Göttingen, Germany | November 2024 – Present

- Spearheaded development of a climate tech Data-as-a-Service platform enabling forest sustainability analysis for investment decisions.
- Collaborated with data scientists to build tools that analyze forest data for sustainability and investment opportunities.
- Delivered software solutions that improved operational efficiency by 25%.

Stack: Python, React, AWS, Terraform.

Lead Engineer
EveryHealth GmbH | Berlin, Germany | August 2024 – October 2024

- Automated third-party integrations, reducing manual processes by 40% and enhancing platform scalability.
- Designed and developed a comprehensive SaaS platform for the healthcare industry, including dashboards for doctors, pharmacies, and administrators.
- Migrated legacy no-code solutions to a fully functional custom-built system, improving user experience and scalability.
- Ensured seamless integrations with third-party systems, reducing manual processes by 40%.

Stack: Laravel, Vue.js, REST APIs.

Senior Software Engineer
Hello Pine UG | Hamburg, Germany | August 2023 – January 2024

- Migrated infrastructure to a new cloud provider using Terraform, boosting monitoring efficiency by 30%.
- Automated CI/CD pipelines, cutting deployment time by 50%, and integrated Amazon Marketplace/WooCommerce APIs to drive 20% sales growth.

Fullstack Developer
Rebike Mobility GmbH | Munich, Germany | February 2022 – February 2023

- Optimised e-commerce platform performance, achieving 40% faster page load times and a 25% rise in customer satisfaction.
- Developed custom plugins that increased online sales by 20%.

Fullstack Engineer
Gronda GmbH | Austria | March 2021 – December 2021
- Reduced infrastructure costs by 40% through cloud migration and optimisation.
- Implemented Docker caching and automated testing, slashing error rates by 80%.

Co-Founder/CTO
MySub.io | Remote (USA) | 2022 – Present
- Launched a subscription-sharing platform operational in 10+ countries, solving accessibility challenges for 100k+ users.

Co-Founder/CTO
RentieNG | Nigeria | January 2020 – April 2021
- Scaled a property rental platform to 5,000+ active users, securing a $5k Tony Elumelu Foundation grant.

Software Engineer Roles
Baobab Partners LLC (USA), RelianceHMO (Nigeria), PrepclassNG (Nigeria) | 2020–2021
- Built project management tools, streamlined customer support systems (25% ticket reduction), and led teams to develop portals driving 55% tutor onboarding growth.

EDUCATION
Bachelor's Degree in Computer Science
Federal University of Agriculture Abeokuta, Nigeria | 2018

Recipient of the Total Oil & Gas Scholarship for academic excellence.

TECHNICAL SKILLS
- ➔ Languages: JavaScript (TypeScript/Node.js), PHP (Laravel), Python
- ➔ Cloud & DevOps: AWS, DigitalOcean, Docker, Terraform, CI/CD pipelines
- ➔ Web Development: React, Vue.js, Tailwind CSS, REST APIs
- ➔ Soft Skills: Technical leadership, cross-functional collaboration, mentoring

---

OPEN-SOURCE CONTRIBUTIONS
01. LaravelBatch: Database batch processing library (2.24M+ installs).
02. Laravel Log Viewer: Log management tool (198k+ installs).
03. Made-in-Nigeria: Repository showcasing Nigerian tech projects (1k+ GitHub stars).
04. 20+ published packages on GitHub.

AWARDS & RECOGNITION

CodersRank Top 1% Worldwide | 2023
Tony Elumelu Foundation Grant | 2020 ($5k for RentieNG)
Total Oil & Gas Scholarship | 2018

MEDIA FEATURES

1. TechCabal: Featured for MySub.io's subscription-sharing innovation.
2. ApNews: Highlighted for tbvh.app's messaging solutions.
3. The Student Entrepreneur: Profiled for RentieNG's impact.

Dear Sir/Madam,

Recommendation for Zacchaeus Bolaji - Global Talent Visa Application

It is with great enthusiasm that I endorse Mr. Zacchaeus Adebayo Bolaji's application for the UK Tech Nation Visa. As Co-Founder and CEO of Baobab Partners—a global software development firm with teams across the U.S., Nigeria, and the UK—I have led the creation of enterprise solutions for clients like Microsoft and IBM. I have over 10 years of experience in leading teams to deliver innovative solutions for clients in a number of sectors, including healthcare and financial services. I am also experienced in scaling SaaS platforms and facilitating technical talent. Mr. Bolaji, a key architect of one of our key internal projects, LEAF, has demonstrated exceptional innovation, scalable product development, and alignment with the UK's tech priorities over the past five years.

A. MY EXPERTISE & PROFESSIONAL RELATIONSHIP

I completed my BA at Duke University and served as a combat and horizontal engineering platoon leader in the US army. I then moved into tech consulting, working with some of the largest companies in the world and attaining multiple architectural and professional certifications before leaving to start Baobab Partners was founded in 2017. We focus on building scalable enterprise applications. Since expanding to Lagos, Nigeria, in 2018, we have grown into a team of 20+ professionals, including a dozen developers in Lagos. Mr. Bolaji joined Baobab Partners in April 2020 as a Frontend Engineer and rapidly advanced to lead a number of critical product development initiatives.

1. Innovation: Development of Original Digital Products

Mr. Zacchaeus Adebayo Bolaji 's work at Baobab Partners exemplifies product innovation, not mere implementation. Mr. Bolaji led the design and development of LEAF's unified dashboard, a novel

solution integrating time-tracking, invoicing, and tax calculations for our internal operations. Unlike existing tools like Jira or Asana, LEAF was built from scratch to address our distributed firm's unique needs, and support the disparate workflows necessitated by the high variation of client requirements we support. His solution reduced administrative tasks by developers and key functional team members by roughly 10 hours per month. LEAF is now a key internal tool critical to our own operations, and we are in the process of making the necessary architectural changes for commercialization. Mr. Bolaji also engineered a dynamic payment system supporting 50+ currencies, integrating Stripe and PayPal APIs while complying with international regulations, allowing us to handle our invoicing and collections directly from the same platform, ensuring that all of our information flows seamlessly from one business function to another, significantly improving our own operations. I also remember he personally advocated for and implemented WCAG 2.1 compliance in LEAF, showing admirable foresight and reducing the barriers on the path to external release.

2. Entrepreneurship: Founding MySub.io

Mr. Bolaji founded MySub.io, a subscription-sharing platform serving 100,000+ users. This venture highlights his ability to:

i. Identify Market Gaps: MySub.io addresses the growing demand for cost-effective subscription management.

ii. Deliver Scalable Solutions: The platform's user base has grown organically since its launch, demonstrating product-market fit.

3. Recognition as a Leading Talent (2019–2023)

At Baobab Partners, Mr. Bolaji mentored junior developers in React and TypeScript, reducing sprint cycle times by 25% through agile methodologies. LEAF's success led to its internal adoption and utilization over tools like Jira and Asana, and this was largely due to the part that Mr. Bolaji had in its creation and deployment.

B. ALIGNMENT WITH UK TECH PRIORITIES

Mr. Bolaji plans to relocate to Manchester, where his expertise aligns with the city's tech goals. I wholeheartedly endorse his decision given the fact of the blooming tech economy of the city.

Manchester is home to several innovative companies which aligns well with his expertise in SaaS development and cloud infrastructure. His experience building LEAF's cloud-based platform directly supports Manchester's focus on SaaS innovation. LEAF's accessibility framework addresses the UK's commitment to digital inclusion and MySub.io's scalable model can adapt to the UK's subscription economy, which generates £8B annually.

Having worked closely with Mr. Bolaji, I am confident that his relocation to Manchester will yield mutual benefits. His ability can also help to strengthen Manchester's tech community, as the city invests in upskilling programs like Manchester Digital's apprenticeship schemes.

C. CONCLUSION

Mr. Bolaji is a product innovator who designs solutions that solve systemic challenges. His work on LEAF, a platform developed from scratch, and MySub.io demonstrates technical mastery, entrepreneurial vision, and alignment with the UK's ambition to lead in inclusive, scalable tech. I urge the committee to approve his application.

I humbly urge the Tech Nation Visa Committee to consider Mr. Bolaji's application. His technical brilliance has proven a lasting impact on global projects which aligns with the UK's innovation goals. He is not merely an engineer but a visionary who transforms ideas into scalable solutions. As a professional, I can attest that he will no doubt elevate the UK's position as a leader in the global tech industry.

For verification of LEAF's metrics or MySub.io's user base, please contact me directly.

Respectfully submitted,

Stratten Waldt

Co-Founder & CEO, Baobab Partners LLC

Opeyemi Obembe

TechNation UK

20-22 Wenlock Road,

London, N1 7GU.

Dear Sir/Madam,

Recommendation for Zacchaeus Bolaji - Global Talent Visa Application

I am Opeyemi Obembe, also known as Kehers in the tech community, with over fifteen years' experience in the advancement of innovation across software development, DevOps, product design, and engineering leadership. I was also the Chief Technology Officer at Reliance HMO between 2017 and 2020. RelianceHMO is a pioneering Healthtech startup that was formed to address the inherent problems in allowing employees access healthcare instantly via telemedicine and it was in RelianceHMO where I led the development of platforms that revolutionized healthcare accessibility for hundreds of thousands of Nigerians.

Currently, I am the founder of Engage, a marketing automation platform that empowers businesses to enhance customer engagement through advanced segmentation and personalized communication. My professional journey has been defined by a commitment to solving complex challenges through technology, and today I offer my endorsement for Zacchaeus Bolaji, an exceptional engineer and visionary whose contributions to the tech ecosystem merit recognition.

I had the privilege of working with Zacchaeus Bolaji as a Backend Engineer at RelianceHMO from January to December 2020. The Year 2020 was particularly challenging for the engineering team as we were scaling our operations and it took a toll on the team. Critical inefficiencies in our internal systems were exposed, particularly in customer support and backend infrastructure, and threatened to undermine the quality of service we provided. I had to task specific teams with scaling these infrastructures.

While this was a group project, Zacchaeus joined the team with a quiet determination and a knack for identifying systemic issues. His first personal contribution involved redesigning the internal tools used by our customer success team, which were unable to handle the volume of support requests. Zacchaeus was able optimize the system, scale process, and make feature improvements like automated ticket prioritization. This subsequently reduced daily support tickets by twenty five

percent, a feat that directly correlated with a fifteen percent improvement in enrollee satisfaction scores. He and his team's work not only alleviated the burden on RelianceHMO but also ensured that users received timely and accurate resolutions, reinforcing trust in our platform.

One of Zacchaeus's other impactful projects was refactoring some of the legacy backend services that had become bottlenecks during peak usage periods. These systems, built during RelianceHMO's early stages, were not designed to handle the exponential growth we experienced so Zacchaeus and his team had to spearhead the migration to a microservices architecture, leveraging containerization and orchestration tools to enhance scalability. This overhaul allowed us to process claims and approvals fifteen percent faster which was a critical improvement during a period when our user base was expanding rapidly. Zacchaeus's ability to balance immediate fixes with long term strategic improvements, ensuring that each change aligned with our broader technical roadmap was very evident during this time.

Zacchaeus demonstrated an entrepreneurial mindset that went above and beyond his role as an engineer. His ability to translate business objectives into engineering solutions was instrumental during the launch of our telemedicine integration, a project that required seamless coordination between backend APIs and third party healthcare providers. Zacchaeus's work on this feature ensured real time data synchronization, enabling doctors to access patient histories instantly during virtual consultations, and this has proven to be very indispensable in our operations.

Since his time at RelianceHMO, I have followed Zacchaeus's career with admiration. His ventures, including TBVH, an anonymous messaging platform promoting authentic digital communication, and MySub, a subscription sharing service with over fifty thousand users, exemplify his ability to identify market gaps and deliver innovative solutions. TBVH, in particular, addresses the growing demand for privacy in online interactions, offering users a space to share unfiltered feedback without fear of judgment. MySub.io, meanwhile, simplifies access to premium digital services for cost conscious consumers, a concept that has resonated globally, evidenced by its adoption in over ten countries. These projects show Zacchaeus's versatility as both a technologist and a product thinker, qualities that align with the UK's emphasis on fostering entrepreneurial talent.

Opeyemi Obembe

The United Kingdom, particularly cities like Manchester and London, offers a fertile ground for Zacchaeus's talents. Manchester's tech scene, characterized by a blend of established firms and agile startups, aligns with his expertise in scalable systems and SaaS platforms. His experience in health technology at RelianceHMO positions him to contribute to the UK's digital health initiatives, while his entrepreneurial ventures could inspire innovation within the country's vibrant startup ecosystem. Manchester's emphasis on sustainable technology and collaborative innovation resonates with Zacchaeus's work on climate focused platforms like 44moles, where he developed tools for analyzing environmental data to support sustainability efforts.

I strongly endorse Zacchaeus Bolaji for the Tech Nation Global Talent Visa via the Exceptional Promise route. His technical excellence, entrepreneurial acumen, and commitment to collaborative progress embody the qualities the program seeks to attract. Zacchaeus is a catalyst for meaningful change, capable of driving advancements that benefit both the tech industry and society at large. I fully support his application for the Global Talent Visa and would be happy to provide further insights if needed.

Sincerely,

15/05/2025

Dear Sir/Madam,

Recommendation for Zacchaeus Bolaji - Global Talent Visa Application

My name is Olumide Ogunlana, and I am the Cofounder and Director of PrepclassNG, one of Nigeria's most recognized EdTech platforms. Since our inception, Prepclass has connected thousands of families with vetted tutors through a technology-powered marketplace that I have overseen for over a decade. It is from this experience and deep engagement in Africa's growing technology landscape that I write to strongly recommend Zacchaeus Adebayo Bolaji for the UK Global Talent Visa under the Exceptional Promise route.

Prepclass was created to solve a real need in Nigeria, access to quality, personalized education. Our platform facilitates this by offering robust tutor-parent matching, session tracking, secure payments, and a CRM that enables seamless communication with both customers and educators. Our growth over the years, both in terms of users and technological scale, has only been possible because of exceptional individuals like Zacchaeus.

Zacchaeus joined our team as a Fullstack Engineer during a crucial period when Prepclass was scaling aggressively and battling with significant technical debt. While many developers would have focused solely on fixing bugs or building isolated features, Zacchaeus displayed a rare combination of technical depth, product ownership, and business insight. He understood the *why* behind our goals and worked to align our technology with them.

One of Zacchaeus's most important contributions was the complete overhaul of our payment infrastructure. At the time, we were facing complaints about delayed disbursements, user onboarding errors, and a lack of real-time transparency for tutors.

Zacchaeus didn't just patch these problems, he re-engineered the system. He:

Ground floor
13, Hughes Avenue, Alagomeji B/stop, Yaba, Lagos
Info@prepclass.com.ng
012713970, 08059811502, 08187878509
www.prepclass.com.ng
facebook.com/prepclass.com.ng
twitter.com/prepclassng

- Integrated a more stable and secure payment gateway
- Developed a real-time earnings dashboard for tutors
- Improved onboarding and KYC flows for new users
- Built robust fail-safe mechanisms for edge cases like network downtimes and refund issues

The result was remarkable: within a year of deploying his updates, our recurring payment rate increased by over 150%. But what numbers don't fully convey is his meticulous attention to reliability. Zacchaeus tested unusual edge cases, anticipated user behaviors, and spent countless late nights ensuring we'd never risk double-charging a parent or underpaying a tutor even during server failures or outages.

Zacchaeus consistently showed a strong bias toward impact and ownership. Beyond payments, he contributed significantly to the improvement of our internal CRM system, which had been struggling to keep up with increasing customer and tutor volumes.

He restructured its backend to:

- Better support automated lead capture and tagging
- Reduce the response time for customer service tickets
- Enhance analytics so we could track tutor engagement and session outcomes

These improvements led to measurable gains in efficiency. Our sales and operations teams were able to manage a larger volume of leads with fewer drop-offs, and our customer support resolution times decreased noticeably.

He also mentored junior developers, helped with technical documentation, and contributed to product roadmap discussions, all while maintaining high-quality code and collaborating effectively across departments.

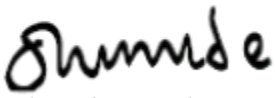

What impresses me most about Zacchaeus is that he doesn't see himself only as a developer. He's a problem-solver with a strong product instinct. I've had numerous conversations with him about the future of education technology, particularly around AI-driven personalization, adaptive learning, and the use of machine learning to support learners with disabilities. These are areas where he has expressed a desire to make further contributions, and where I believe the UK tech ecosystem, especially its thriving EdTech and AI scenes, would benefit immensely from his involvement.

Zacchaeus has also demonstrated a passion for open-source and community engagement, building tools that are used by other developers and contributing meaningfully to collaborative projects. He's precisely the type of forward-thinking engineer who will bring both skill and social awareness to any initiative he joins.

In summary, Zacchaeus Bolaji is an exceptional emerging talent whose track record of impact, dedication to excellence, and vision for technology make him an ideal candidate for the UK Global Talent Visa. He brings not just technical ability, but a strategic mindset and the rare ability to turn complex systems into intuitive, scalable, and impactful products.

I believe he will be a valuable addition to the UK's technology sector, not only as a builder, but as a mentor, leader, and innovator. I recommend him without reservation and welcome any opportunity to provide further context or information.

Sincerely,

Olumide Ogunlana

Dear Sir or Madam,

Recommendation Letter for Zacchaeus Bolaji

I'm Dimitri Bilyarchyk, and I co-founded Every Health, a healthcare technology startup with headquarters in Berlin. Every Health is a platform made to help administrators, pharmacies, and medical professionals work more efficiently. I have hired and managed dozens of people throughout my career, especially in the fields of operations, product development, and technology. I evaluated and supported early-stage healthtech and SaaS startups as an investor at Atlantic Labs before starting Every Health. Additionally, I worked in analytical positions at Axel Springer and Capnamic Ventures, where I was responsible for strategic growth and venture development. I now have a strong ability to identify people who combine technical expertise with business impact thanks to these experiences.

During his tenure at Every Health from August to October 2024, Zacchaeus Bolaji was our only technical team member, and I had the chance to work closely with him. Despite his short tenure with us, Zacchaeus contributed significantly and was greatly valued during a critical stage of our product development.

Zacchaeus joined our company in August 2023 as a Lead Engineer. The user feedback we received revealed serious flaws in our no-code tool, which was intended to assist healthcare providers in managing patient data and prescriptions. For example, pharmacies had trouble with slow performance, doctors found the interface to be complicated, and our internal team was overburdened with fixes rather than progress. We required a visionary who could completely rethink the platform at this point, not just small tweaks. At this point, Zacchaeus emerged with a unique combination of ambition and humility.

He became fully immersed in our users' daily lives during his first month at EveryHealth. He set up online meetings with doctors to learn about their annoyances. He went to pharmacies to see how they dealt with workflow issues, and he even looked over support tickets to identify common problems. Every technical choice he made was influenced by this sympathetic approach.

Every Health had issues with our no-code platform at the time Zacchaeus joined, especially with regard to scalability, performance, and usability. Zacchaeus swiftly assumed responsibility for the situation as the sole member of the technical team. He actively interacted with pharmacists and clinicians to fully comprehend their needs, and he quickly turned their suggestions into workable changes.

His creation of an automated insurance validation feature was one of his most notable contributions; it simplified a significant pharmacy pain point. He also gave us advice on how to move from a no-code setup to a more scalable custom platform. He suggested using React for the frontend and Node.js for the backend, which set the stage for our future expansion.

Superior Technical Performance and Strategic Influence

Our old no-code system was converted to a specially designed SaaS platform under Zacchaeus's leadership. He was able to support a modular architecture in this case, enabling pharmacies and clinics to customize their dashboards without the need for developer assistance. His clever reimagining allowed users to customize the platform to suit their own requirements while cutting our customer service workload by 40%. With his assistance, the engineering team was able to implement Laravel for the backend and React for the frontend for the sole reason of scalability when we entered new markets.

One instance that demonstrated Zacchaeus's aptitude for solving problems occurred during one of our discussions with a large hospital network. Their IT team raised issues regarding data security in our API integrations a few days prior to contract finalization. Zacchaeus carried out a comprehensive audit of their current infrastructure to find vulnerabilities they were unaware of, whereas others might have chosen to apply temporary fixes. After that, he assisted them in creating a safe API gateway that included role-based access controls and multiple layers of encryption. In addition to allaying their worries, his design turned into a selling point for potential customers. This response demonstrated his capacity to transform obstacles into opportunities.

Every Health*

Zacchaeus showed remarkable pragmatism, a strong propensity for action, and lightning-fast execution during his time with us. In a short period of time, his capacity to rapidly comprehend business requirements, set priorities wisely, and produce measurable outcomes made a significant impact.

Prospects for the Future

With projects like MySub.io and his open-source contributions, Zacchaeus's technical proficiency, problem-solving approach, and entrepreneurial spirit put him in a strong position to prosper in the UK's thriving tech sector. I have no doubt that he will contribute vitality, knowledge, and useful creativity to any community or organization he joins.

In conclusion

I'm happy to suggest Zacchaeus for the UK Tech Nation Visa based on my interactions with him at Every Health. He will, in my opinion, be a great asset to the Manchester tech scene and beyond.

Sincerely,
